

Call for Submissions
Outreach in Regional Science Special Sessions
North American Meetings of the RSAI
San Diego, CA, November 14-18, 2023

NARSC members are dedicated to doing policy-relevant, engaging, and impactful research. However, the best research is often hidden behind paywalls and technical jargon. We are organizing special sessions for outreach in regional science as part of a larger effort to increase outreach among regional scientists. Submissions should have policy-relevance to North American regions and be written and presented in non-technical language.

Submissions can include but are not limited to the following:

- Original descriptive analyses
- Non-technical summaries of published academic research
- Case studies with broader implications
- Research syntheses

If interested, please submit your abstract online on the NARSC submission portal (<http://www.narsc.org/newsite/conference/online-abstractsession-submission/>) and then email us the title, abstract, submission ID (e.g., P54321), author information, and contact details by June 15, 2023.

Outreach papers presented in the special sessions may also be invited to submit for possible publication in a new outreach-oriented journal.

Please feel free reach out if you want to discuss the suitability of your submission or broader regional science outreach efforts.

Heather Stephens, West Virginia University (heather.stephens@mail.wvu.edu)
John Winters, Iowa State University (winters1@iastate.edu)
